MIDTERM PROJECT IN ART APPRECIATION

Deadline: October 29. 2026

Project Type: Group Website Development
Output: An Interactive Art Appreciation Website
Submission: A published, accessible website link

I. PROJECT OVERVIEW

For your midterm project, each group will design and develop an original, creative, informative, and interactive website based on its assigned topic in Art Appreciation.

Your website must demonstrate your understanding of the assigned topic by presenting important concepts, discussions, examples, and lessons from the Art Appreciation module provided by your instructor. You may also use reliable outside sources to supplement the module and enrich your content.

Your task is not simply to create a website containing copied information and pictures. You must develop an engaging online learning experience where visitors can explore artworks, discover information about artists, appreciate different forms of art, and participate in interactive activities.

Think of yourselves as a team of website designers, writers, researchers, artists, and digital content creators. Your goal is to produce a website that is visually appealing, easy to navigate, educational, and enjoyable to explore.

Your challenge: Build a website that allows visitors not only to learn about art but also to experience, interpret, appreciate, and interact with it.

II. ASSIGNED TOPICS FOR THE NINE GROUPS

Each group must develop a website based on its assigned topic.

1. **Group 1:** Humanities and Art Appreciation: An Introduction
2. **Group 2:** Aesthetic Arts and Crafts
3. **Group 3:** The Western Art History
4. **Group 4:** The Filipino Art and Crafts
5. **Group 5:** Paintings
6. **Group 6:** Sculpture
7. **Group 7:** Photography
8. **Group 8:** Music
9. **Group 9:** Drama

Each group must create an original website name, logo or visual identity, and overall design that reflect its assigned topic. You may use creative titles, color schemes, typography, illustrations, animations, and other appropriate web design elements.

III. IMPORTANT INSTRUCTION: ALIGNMENT WITH THE ART APPRECIATION MODULE

Each group must ensure that its website covers **selected topics, concepts, and lessons included in the Art Appreciation module provided by the instructor**.

Before developing your website, review your assigned module carefully. Identify the most relevant concepts and lessons that you can explain, illustrate, analyze, and present creatively.

Your website must:

1. Include important concepts and discussions from the assigned module related to your topic.
2. Explain these concepts in your own words to demonstrate your understanding.

3. Provide relevant examples, artworks, artists, illustrations, and applications.
4. Incorporate module-based concepts into your articles, visual presentations, and interactive activities.
5. Use additional credible sources when necessary to support and enrich your discussion.

You are not required to include every lesson in the module. Select relevant topics that will allow you to create a well-organized, informative, and engaging website.

Important: Your website must not rely entirely on information gathered from the internet. The assigned module must serve as one of the primary foundations of your content. Your work will be evaluated based on both its creativity and the accuracy of its academic content.

IV. REQUIRED WEBSITE PAGES AND CONTENTS

Your website must contain the following pages or clearly organized sections. You may arrange them creatively as long as all required components are included.

1. Homepage: Welcome to the World of Art

Create an attractive homepage that introduces visitors to your website.

Include:

- Your website's original name and logo or visual identity
- Your assigned topic
- A welcome message or short introduction
- An eye-catching banner featuring relevant artwork, photographs, illustrations, or other visuals
- A brief overview of what visitors can explore
- Clear navigation links to the other pages or sections

The homepage should immediately capture the visitor's attention and communicate the purpose of your website.

2. About the Topic: Understanding Art

Create a page that introduces and explains your assigned topic.

Discuss its meaning, characteristics, history, development, elements, techniques, or significance, depending on the subject. Incorporate relevant concepts from your Art Appreciation module.

Use headings, short paragraphs, images, diagrams, and examples to make the information easy to understand.

3. Art Gallery: Explore the Artworks

Develop a digital gallery showcasing artworks, crafts, photographs, musical works, sculptures, dramatic productions, or other examples related to your topic.

For each featured example, include relevant information such as:

- Title or name of the work
- Artist or creator, when known
- Image, audio, video, or other appropriate media
- Brief description
- Meaning, artistic value, historical importance, or cultural significance

Ensure that all examples are relevant to your assigned topic. Credit the original creators and sources of borrowed materials.

4. Artist Spotlight: Meet the Creators

Feature at least one notable artist, craftsperson, musician, photographer, sculptor, playwright, or other relevant figure.

Include a short biography, notable works, contributions, and explanation of their importance to the art form.

Whenever possible, connect their works to concepts discussed in your module.

5. Interactive Zone: Play, Solve, and Learn

Every group must include **at least three interactive activities** related to its assigned topic and the concepts discussed in the Art Appreciation module.

The activities must allow visitors to participate actively rather than simply read information.

You may include:

A. Online Quiz

Create a quiz using multiple-choice, identification, or true-or-false questions. Include at least five questions and provide a way for visitors to check their answers.

B. Crossword Puzzle or Word Search

Create a puzzle using important terms, artists, techniques, movements, or concepts related to your topic. You may use an online puzzle creator and embed or link the activity on your website.

C. Guess the Artwork or Artist

Display an artwork, a cropped image, or a set of clues and challenge visitors to identify the artist, artwork, art form, or style.

D. Matching Game

Ask visitors to match artists with their works, terms with their definitions, or art movements with their characteristics.

E. Decode the Artwork

Present an artwork and ask visitors to interpret its mood, symbols, possible meaning, or message. Provide guiding questions and, where appropriate, a sample interpretation.

F. Art Appreciation Poll

Ask visitors to choose their favorite artwork, style, musical genre, photograph, or interpretation. Include a question inviting them to explain their choice.

G. Creative Challenge

Invite visitors to sketch, design, write, photograph, compose, or imagine something related to your topic. Provide instructions for completing the task.

H. Interactive Art Gallery

Allow visitors to explore selected works through clickable images, information cards, slideshows, or linked descriptions.

Requirements for the Interactive Zone:

- Include at least three distinct activities.
- Make sure every activity relates to your assigned topic.
- Incorporate concepts from your Art Appreciation module.
- Provide clear instructions for visitors.
- Make activities functional and test them before submission.
- Include correct answers or feedback for objective activities.
- Ensure that activities can be accessed easily from your website.
- If you use an external quiz or puzzle tool, provide a working link or embed it into your website when supported.

6. Art Appreciation Reflection

Create a page or section containing your group's reflection on the assigned topic.

Discuss what your group learned, why the topic is important, and how it contributes to people's understanding of art, culture, and everyday life.

You may also include a quotation about art, provided that the original source is properly credited.

7. References and Image Credits

Create a dedicated references page or section listing the module materials, books, articles, websites, and other sources used in developing your website.

Follow APA 7th edition formatting as appropriate. Provide proper credit for borrowed information, images, artworks, quotations, audio, and videos.

Your original creative work should be identified as such. If you adapt or draw inspiration from an existing artwork, acknowledge the source and explain your interpretation.

8. Meet the Creators: Group Members and Instructor

Your website must include a dedicated page or section introducing the people behind the project.

For every group member, include:

- A clear individual picture
- Complete name
- Assigned role or contribution, if applicable

You must also include your **Art Appreciation instructor's complete name and picture**.

Your group must personally ask your instructor for their correct name and picture to include on the website. Do not guess the instructor's name or use an unverified photograph from the internet.

You may title this page *“Meet the Creators,” “Our Team,”* or *“The People Behind the Project.”*

Design the page creatively, like a professional website team directory, with a short introduction and well-organized profile cards.

Make sure every name is spelled correctly and each picture is labeled appropriately. Ask permission before publishing personal pictures on a publicly accessible website.

V. WEBSITE DESIGN AND TECHNICAL REQUIREMENTS

Your website must follow these requirements:

A. Design and visual presentation

- Use a consistent color palette, typography, and visual identity.
- Choose a design that complements your assigned topic.
- Use readable text and appropriate font sizes.
- Organize information into clear headings and sections.
- Use relevant, high-quality visuals.
- Avoid overcrowded pages and excessive animations.
- Maintain a professional, creative, and visually appealing appearance.

B. Navigation and accessibility

- Include a working navigation menu or clearly labeled links.
- Make sure visitors can easily move between pages.
- Ensure that all buttons, links, images, videos, and interactive activities work correctly.
- Add descriptive captions or alternative text to important images where possible.
- Make the website usable on both desktop computers and mobile devices.

C. Website platform

You are not required to build a website by coding from scratch. You may use a website builder, provided that your final output is a functioning website and not merely a slideshow, document, or collection of screenshots.

D. Originality and responsible use of digital materials

- Create your own website identity and layout.
- Do not copy another website's complete design or content.
- Cite all borrowed information and media.
- Use appropriate and credible sources.
- Ensure that your original creative work demonstrates your group's effort and understanding.
- AI tools may assist with brainstorming or design suggestions, but they must not replace your group's own analysis, decision-making, and original creative contributions.

E. Access and publication

- Publish or share your website using a working link.
- Set the sharing permissions so your instructor can access and evaluate the website.
- Test the link using a separate browser or device, if possible.
- Confirm that all required pages and activities are accessible before submission.

VI. GRADING RUBRIC

Your website will be evaluated according to the following criteria.

Criteria	Points
Accuracy, depth, and relevance of content, including alignment with the module	25
Creativity and originality of the website	20
Visual design, layout, navigation, and user experience	15
Quality of the original creative output	15
Functionality and relevance of interactive activities	10
Organization, writing, and proper references	10
Completeness of group members' and instructor's names and pictures	5
TOTAL	**100**

VII. SUBMISSION AND PRESENTATION

1. Submit your published website link on the date announced by your instructor.
2. Ensure that your instructor has permission to access the website.
3. Each group will demonstrate its website to the class.
4. During the presentation, explain the website's concept, the major lessons covered, the original creative output, and the interactive activities.
5. Demonstrate at least one interactive activity and show how visitors can use it.
6. Every group member must participate in the preparation and development of the website. Individual contributions may be considered during evaluation.
7. Be prepared to explain your design choices, sources, and interpretations of the featured artworks.
8. Verify that all required pages are complete and that your instructor's name and picture have been included after requesting them directly.

As an additional class activity, groups may visit one another's websites and complete their quizzes, puzzles, and other interactive activities. This will allow every group's website to serve as a digital learning resource for the entire class.

VIII. FINAL REMINDERS

Your website should combine **knowledge, creativity, originality, and interaction**.

Do not simply create a page full of copied text and unrelated pictures. Use your assigned module as the foundation of your content, then present the lessons through meaningful examples, original creative work, and engaging digital activities.

Before submitting, ask yourselves:

- Does our website cover important concepts from the assigned module?
- Is our website visually appealing and easy to navigate?
- Have we included at least three functional interactive activities?
- Does our website feature an original creative output?
- Are our references and image credits complete?
- Have we included the correct names and pictures of every group member and our instructor?
- Can our instructor open and explore the website without difficulty?

YOUR FINAL CHALLENGE

MAKE SURE PEOPLE CAN COMMENT OR WRITE SOMETHING ON YOUR WEBSITE. Create a website that your classmates will enjoy exploring, learning from, and interacting with.

Make it informative enough to teach, creative enough to inspire, and interactive enough to keep visitors engaged.

Do not just present art. Create an experience through art.
